WKS - Graphing Sine & Cosine

Date _____

Hour _____

1. Consider the function: $y = \frac{-1}{2} \cos(3x - \frac{\pi}{2}) + 2$

The amplitude is $\frac{1}{2}$ The phase shift is $\frac{\pi}{6}$ units up down left right

The period is $\frac{2\pi}{3}$ The vertical shift is 2 units up down left right

2. For $y = -6\sin(4x + \pi) + 3$

Write the equation in standard form $y = -6\sin(8x + 2\pi) + 3$

The amplitude is 6 The phase shift is $-\frac{\pi}{4}$ units up down left right

The period is $\frac{\pi}{4}$ The vertical shift is 3 units up down left right

3. For $y = a \sin(bx - c) + d$ give a complete description of the translation that occurs based upon
- a vertical stretch/compr by a
 - b changes the period (horiz stretch/compr)
 - c changes the starting point (horiz. shift)
 - d vertical shift

For each of the following, graph the basic function, either $y = \sin x$ or $y = \cos x$ and then graph one complete cycle of the following functions.

4. Sketch the graph of $y = \frac{-1}{2} \cos(3x - 0)$

The amplitude is $\frac{1}{2}$

The phase shift is 0 units up down left right

The period is $\frac{2\pi}{3}$ $\frac{2\pi}{12} = \frac{\pi}{6} \neq \frac{\pi}{4}$

The vertical shift is 0 units up down left right

Graph on the back!

5. Sketch the graph of $y = 2 \sin(x - \frac{\pi}{2})$

The amplitude is 2

The phase shift is 0 units up down left right

The period is 2π

The vertical shift is 1 units up down left right

Graph on the back!

7. Sketch the graph of $y = \cos(2x - \pi)$

The amplitude is 1

The phase shift is π units up down left right

The period is π

The vertical shift is 0 units up down left right

Graph on the back!

8. Sketch the graph of $y = 2 \sin(\frac{1}{2}x + \frac{\pi}{2}) - 1$

The amplitude is 2

The phase shift is $-\pi$ units up down left right

The period is 4π $\frac{2\pi}{\frac{1}{2}} = 4\pi$

The vertical shift is 1 units up down left right

Graph on the back!

7) Graph $y = \cos x$ & $y = \cos 2(x - \pi)$ $\cos(2x - 2\pi)$

X	Y
π	1
$\frac{5\pi}{4}$	0
$\frac{3\pi}{2}$	-1
$\frac{7\pi}{4}$	0
2π	1

8) Graph $y = \sin x$ & $y = 2 \sin(\frac{1}{2}x + \frac{\pi}{2}) - 1$

X	Y
$-\pi$	-1
0	1
π	-1
2π	-3
3π	-1

4) Graph $y = \cos x$ & $y = \frac{-1}{2} \cos 3x$

x	y
0	$-\frac{1}{2}$
$\frac{\pi}{6}$	0
$\frac{\pi}{3}$	$\frac{1}{2}$
$\frac{\pi}{2}$	0
$\frac{2\pi}{3}$	$-\frac{1}{2}$

5) Graph $y = \sin x$ & $y = 2 \sin x - 1$

x	y
0	-1
$\frac{\pi}{2}$	1
π	-1
$\frac{3\pi}{2}$	-3
2π	-1
